|-------------------------|-------------------|--------------------|---------------------|
| Level 1 | Level 1 | Level 1 | Level 1 |

Oroville Dam Auxiliary Spillway Incident

- Flow from the flood control spillway will be reduced from 40,000 cubic feet per second to zero.
- As flows are reduced, DWR will monitor the status of the dam, spillways, and related structures to ensure their continued safety and stability.
- Flow to the Feather River will be reduced gradually to minimize risk to downstream levees per the Army Corps of Engineers operational requirements.
- This flow reduction in the river will be buffered by the Hyatt Powerplant, Diversion Pool, Thermalito Forebay, and the Thermalito Afterbay to a final flow of 13,000 cubic feet per second.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 03/31/17 at 0600 hours](#):

- Inflow: [17,728](#) cfs.
- Outflow: [13,012](#) cfs.
- The current lake elevation is [839.86](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – Coordinating.
- 2017-SOC-31712: 2 Structural Engineers for evaluation of the Oroville Spillway Bridge (Butte County) – On Scene.

SITUATION SUMMARY

2017 February Winter Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Per the Cal OES Coastal Duty Officer (CDO) on 03/24/17:
 - With the bridge removed, the community of Big Sur is isolated, an estimated 450 people, in 3 different areas/enclaves.
 - Nacimiento-Ferguson Road might be open to the public to provide an access point to the east.
 - Plans for re-supplying locals and handling medical emergencies are in effect with operations that include an airdrop of fuel pods, groceries, pet supplies and livestock food,
 - Backup air medical transport plans have been developed and California National Guard assets have been secured for medical emergencies through Cal OES Law Enforcement Branch
 - The southern detour route was opened as of 03/13/17 to local traffic only.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Solano County: Sacramento River at Rio Vista

WEATHER OF CONCERN

Weather of Concern

- Gusty northerly winds are expected to impact portions of Southwest California into Friday.
- **Active Weather Warnings, Watches and Advisories by County:**
http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php - Temporarily unavailable. NWS is in the process of repairing the page.

WEATHER SYNOPSIS BY REGION

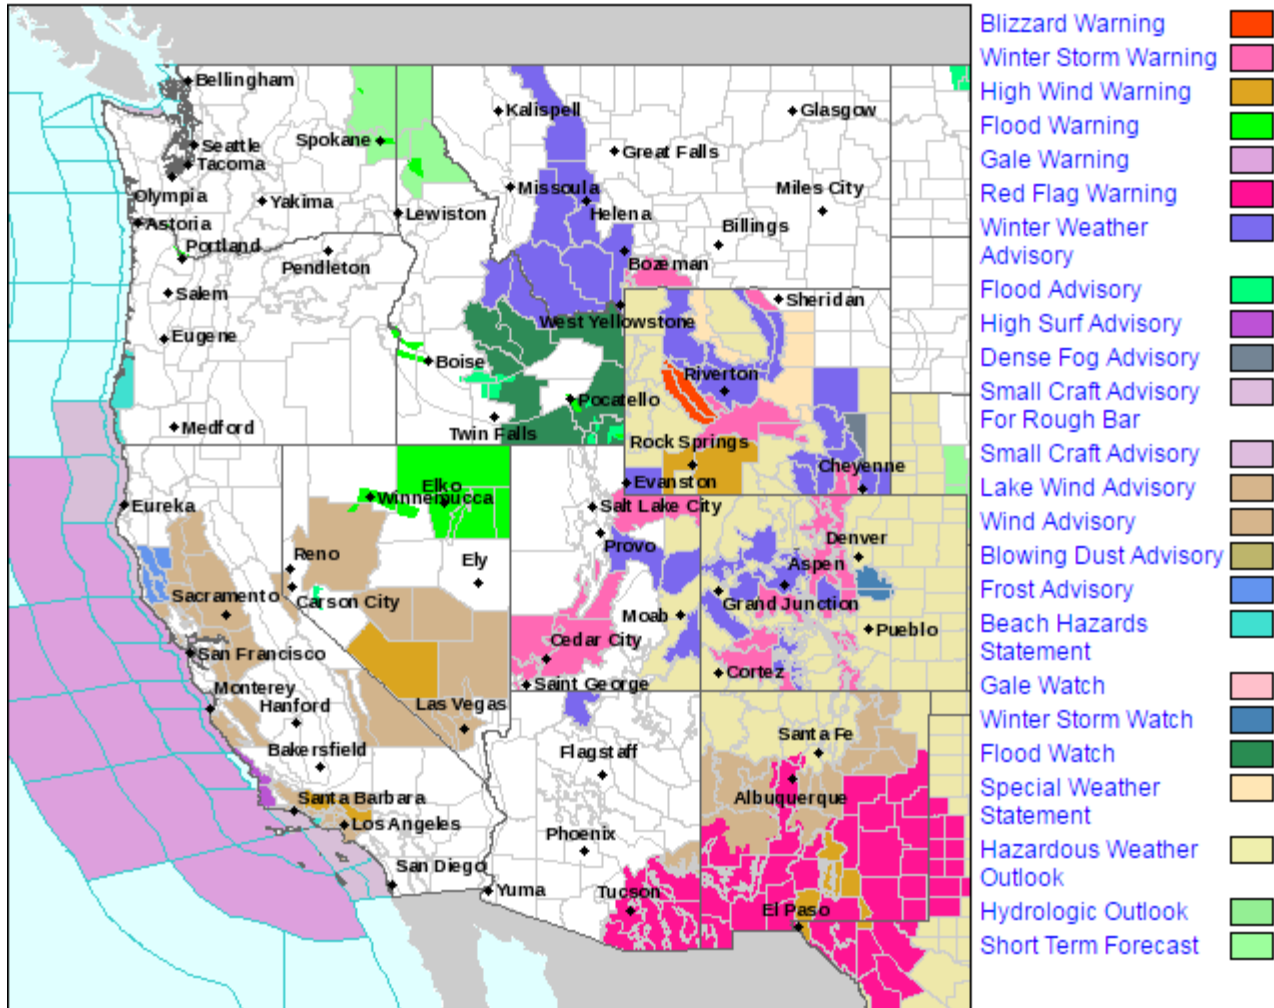

NORTHERN CALIFORNIA

A weather system passing through Northern California will be moving into the Great Basin this morning. Residual cloudiness will be lingering over all the mountains with some morning showers in those same areas. A few showers may also continue to linger near the Oregon and Nevada borders this afternoon. Snow levels will range from about 4000 ft in the NW to about 6000 ft over the Sierra today, but further accumulations will be light. High pressure will be arriving right behind this departing weather system tonight with warm, dry conditions Friday and Saturday. Mostly sunny skies will be in many areas Friday and Saturday, but there will also be some periods with quite a bit of high cloudiness, especially in the north. Many areas will have gusty northerly winds today, then tonight into Saturday they will mostly be over the Sacramento Valley and surrounding mountain areas and become N to NE. The windy areas will have speeds around 12-22 mph sustained with gusts of 30-40 mph for the next few days. Sunday a minor low pressure trough is expected to arrive over the Pacific NW and Northern California with a chance of light showers near the Oregon and Nevada borders later Sunday afternoon and overnight. Next Monday through Wednesday look dry and partly cloudy although some areas may become mostly cloudy Tuesday. Outside of today and Saturday, the warmest inland areas will have afternoon high temperatures in the 70s over the next week. Highs there today will mostly be in the 60s and in the lower 80s Saturday. Very wet weather could return the end of next week.

SOUTHERN CALIFORNIA

An area of low pressure currently over Nevada will bring west to northwest winds of 20 to 40 mph with gusts to 60 mph to the mountains and deserts through tonight. It will be breezy across much of the region this afternoon and evening. The low will move to the Four Corners Area Friday causing winds to become northerly. Winds will be 20 to 30 mph with gusts to 50 mph in the morning from Santa Barbara County eastward to Los Angeles County as well as across the Owens Valley and the Colorado River. The northerly winds will decrease, but remain locally gusty Friday afternoon through Saturday morning. Scattered showers will occur over the Sierra through this afternoon. The snow level will be between 6,000 and 7,000 feet. Temperatures will be near normal through Friday, with upper 40s and 50s across the mountains and mid 60s to mid 70s in the valleys. Minimum humidity will be mainly between 20% and 40% through Friday. A ridge of high pressure will build into California causing temperatures to warm 5 to 10 degrees and minimum humidity to drop to 15% to 30% this weekend. Another trough will drop into the Great Basin from the Pacific Northwest bringing brief cooling and a little increase in humidity Monday. This trough will also bring strong west to north winds to portions of the region Sunday night through Monday night, but the winds with this event will not be as strong as the winds with the current event. Significant warming along with minimum humidity in the single digits and teens will occur Tuesday and Wednesday as the ridge of high pressure over the Pacific builds back into California.
